Trainings and Services

INFORMATION SECURITY

Securing Your IT Initiatives

Softech provides Information Security and Network Security against threat protection, data protection, cloud migration, mobility, Office 365, virtualization and insider threat protection.

Compliance

Softech, with the help of up to date information security solutions, products and services helps your business to comply with multiple regulatory frameworks which include HIPAA, GDPR, ASD, PCI DSS, SOX, POPI, CIS and CIPA.

Professional Services

Softech offers post-sales services:-

Our certified team of engineers, using proven methods and standards, can help you get the highest level of services at comparatively minimal cost.

Public Cloud Security

There is no denying the usefulness and future growth of cloud today, while AWS and Microsoft provide security for their cloud, you are responsible for security of your applications and data on their cloud. Softech provides you solutions just to do that, making your cloud data and applications secure.

Security Insight

Softech gives you complete security insight of your network, email and web that will help you identify the most vulnerable medium which is more prone to threats.

Advanced Threat Protection

To help you prevent zero-day attacks, Softech offers you multilayer defense thus reducing the risk of being attacked by unknown threats.

Protection Against Ransomware

47% of the business have been affected by ransomware so far, and \$209 Millions have been paid to ransomware criminals in the first quarter of 2016. Softech with the help of detect-prevent-recover technology protects your network thus saves your money.

Office 365 Protection

Softech offers a complete defense system against email-borne threats, sandbox analysis, easy-to-use management console and award winning spam filtering to prevent spam, virus, malware, data leaks, phishing threats and even accidental email deletion.

BACKUP, ARCHIVING, STORAGE AND DR

Storage Scalability and Reliability

Long term data retention, performance scalability, maximized capacity and large-scale storage have become growing needs of market.

We bring an award winning distributed grid storage and disk arrays solutions to help you get all the aforesaid features.

Recover Readiness

Business continuity becomes more feasible when you rely on an award-winning disaster recovery solutions and an ICT leader brand that we offer.

Backup and Archiving

Softech prepares your organization to respond and produce important records within required timeframes necessitates a systematic backup and archiving policy.

NAS

Reliable, Easy to access and maintained storage is the need of any SMB and Enterprise level businesses. NAS allows users of a network to share a central storage mechanism using which they can access different shared files and folders and policies can also be applied allowing or disallowing access to certain files and folders for specific users or group of users.

TELECOMMUNICATION

Phone Call Recording

It helps business call recording issues from smaller enterprises to multinational corporations with offices all across the globe- meet their call recording objectives without a glitch.

Unified Communication System

An integration of various means of business communications, such means are instant messaging or chat, VoIP telephony, Audio/video conferencing), Data Communication, Unified messaging, Voicemail, Email and Fax.

Call Centre

A complete set of features to manage the large number of inbound & outbound telephonic calls.

Call center software is designed to help customer reach businesses for customer service across multiple channels, including email, live chat, social media and even text message.

SIP Phones:

Multiple range of SIP Phones with list of features.

DEPLOYMENTS / MODELS

On-Premises

Protect users, data and networks with simple plug-and-play physical and virtual On-Premises appliances.

SaaS

Cloud-based protection of your employees, data, and business.

Google Cloud Platform (GCP)

Protect your applications and data running in Google Cloud Platform (GCP).

Manage All Your Products

SG UTM

Proven protection for your network

Managed Threat Response

24/7 threat hunting, detection, and response

Cloud Optix

Solve the toughest challenges n cloud security

A person wearing a dark pinstriped suit, a white shirt, and a striped tie is shown from the chest down. The image is overlaid with a network diagram consisting of several circular nodes, each containing a white person icon, connected by thin white lines. The diagram is split horizontally: the top half is on a dark background, and the bottom half is on a teal background. The text is positioned in the lower right area of the teal section.

"At Sophos we know that the solution to complexity is not more complexity. We tackle security challenges with clarity and confidence, knowing that simple security is better security."

PRODUCTS

Information Security

BARRACUDA

Barracuda Networks, Inc. is a UK-based brand. The company provides dedicated security, networking and storage products based on network appliances and cloud services.

Email Protection:
Stay protected against today's most advanced threats.

Total Email Protection Bundle
Combines Essentials, Sentinel and PhishLine

Essentials
All-in-one email security, backup and archiving service

Sentinel
A.I.-based protection from spear phishing, account takeover, and business email compromise

PhishLine
Anti-phishing training and simulation platform

Archiving
Solutions for data retention, compliance and eDiscovery

Barracuda Email Security Gateway
Protection Against Evolved Email Attacks

Network and App Security:
Protect networks and apps with cloud-generation firewalls.

CloudGen Firewall
Protection that goes beyond next generation firewalls

SD-WAN
Reduce network costs and ensure availability

IoT Devices
Protect your Internet of Things

Web Application Firewall
Protect websites and applications from cyber threats

WAF-as-a-Service
Protect every web app, hosted anywhere, in minutes

Barracuda Load Balance ADC
Secure Application Delivery & Load Balancing

Barracuda Web Security Gateway
Making web browsing safe

Data Protection:
Get cloud-integrated security for data storage and recovery.

Backup
Cloud-integrated protection for business-critical data for wherever it resides

Cloud-to-Cloud Backup
Cloud-based backup and recovery to protect Office 365 emails and data from accidental and malicious data loss

“Barracuda continues to disrupt the IT-security market with innovative solutions that every business can afford. It is on a mission to protect customers, data and applications from today’s advanced threats by providing the most comprehensive and easy-to-use IT-security platform and backing it up with best-in-class customer support.”

Tape Drives and Media

LTO Ultrium Tape Drives and Disk Cartridge Media

"Protect your data against cyber-attacks with the RansomBlock feature."

PRODUCTS

Backup, Archiving, Storage and DR

NEC

SAN, Tape & Scale-Out Grid Storage, Software-defined, cloud-enabled enterprise servers and systems that help you operate at business speed.

FORTUNE

HyperConverged Infrastructure:

By combining storage, computing and networking into a single integrated system, NEC's HyperConverged Infrastructure (HCI), powered by Scale Computing's HC3 software, transforms and simplifies data and storage management. It replaces arduous fragmented infrastructure with one intuitive, centralized solution.

Built on the company's high-density dual-socket modular server - the D120h - and Scale Computing's intelligent HC3 operating system, NEC HCI delivers cloud-like economy and scalability without sacrificing control of on-site systems.

A single pane of glass console delivers advanced visibility for increased transparency and ease of management.

Storage Hydrastor:

An award-winning distributed grid storage platform.

NEC Storage HS8-50

Scale-out global deduplication storage for backup and archiving

NEC Storage HS6-50A

Scale-out grid storage for archive and long-term data

NEC Storage HS HS3-50

Inline deduplication storage for small or medium enterprises and remote locations

NEC Storage HS Virtual Appliance (VA)

Universal deduplication storage in virtualized environment

NEC Storage HS Encryption

Inline encryption for long-term data

NEC Storage HS WORM

Effortless compliance data management with write-once, read many

Tape Storage:

Back up & Archive

LL009F Compact Tape Autoloader

It is equipped with one LTO Ultrium tape drive and one removable magazine, and is capable of storing up to 270.0 TB of data in only 1U rack space

T30A LTO Tape Library

The T30A is equipped with up to two LTO Ultrium 6, or LTO Ultrium7 tape drives and can accommodate up to 30 tape cartridges. Using 30 LTO Ultrium 7 cartridges, the T30A can store 450.0TB of compressed data

T60A LTO Tape Library

The T60A is equipped with up to four LTO Ultrium 6, or LTO Ultrium 7 tape drives and can accommodate up to 60 tape cartridges. Using 60 LTO Ultrium 7 cartridges, the T60A can store 900.0TB of compressed data.

“As an Information and Communication Technology (ICT) leader with more than 117 years of expertise, NEC with its suite of award-winning high availability, disaster recovery solutions help maintain a connected environment where it is most crucial.”

PRODUCTS

Phone & Voice Systems

We offer the best IP Telephony and Phone Call Recording brands and their services

SOFTECH ACADEMY

Softech IT Academy is your next step for better understanding of Cybersecurity world. In this modern era of technology, Softech IT Academy brings you the latest technical training that will equip you with all the necessary tools required to combat cyber threats. IT professionals can up skill their grip on cybersecurity products, and ensure their companies remain secure. Softech IT Academy comprises of professional, certified trainers, who will equip you with the finest available resources.

Who Should Attend?

Softech IT Academy provides Cyber Security training classes to everyone! Professional can start growing their skill sets and become a part of our education revolution!

This training is not just for Network Engineers. People in the diverse professions will also benefit from this detailed and comprehensive training, such as:

- IT Manager
- Network Administrator
- System Administrator
- Technical Lead
- Infrastructure Engineer
- Network Engineer
- Information Security Engineer
- Cybersecurity Enthusiast
- IT Officer
- Information Security Expert/Consultant

What will be Learned?

Security professional will get a comprehensive view and understanding of security threats and how they may affect them and their companies. They will get complete evaluation and deployment training of the selected product. Along with deployment the students will receive training for completing configuration task, policy creation, backup and updating, reporting and troubleshooting.

Materials Offered

- Student Handbook
- Hands-on Training
- Lab Manual
- Cloud Based Lab Environment

Venue

- Class-room training in Softech IT Academy Training Facility
- Executive training (5 Star Facility)
- Training abroad (UK/UAE)
